

# THE FLYING POTATO

## Add your clip

For a new Belgian television show called 'the potato', we want a potato to travel around the world. We are making a chain of short videos of people catching a potato and passing it on. The Great Wall of China, the pyramids, Niagara Falls,... All locations are welcome.

**Set up:** A potato flies in from the left, someone catches it and does something with it (play soccer, peel it, recite Shakespeare for it, etc.) and then throws it out of the picture to the right.

The next video will be of someone catching your potato, performing with it and throwing it out again.

**Duration:** short (4 – max. 12 sec)

**Important: direction!** The viewer sees the potato flying in from the left and flying out to the right.

**Not important: quality.** You can use mobile phones, digital cameras or whatever you want to film with.

So, make a clip, [upload it](#) and spread the word!
